Firebase / 14d

Genkit is an AI integration framework designed for app developers. It allows you to easily integrate powerful AI capabilities into your apps with familiar patterns and paradigms. Join @PeteIvrie to learn what Genkit is, get to ...

Veille réalisée sur Feedly selon 2 axes.

Un premier sur le développement de manière général, agnostique d'un point de vue langage, en y incluant une partie sur la sécurité afin de se tenir informé en cas de faille majeure.

Le second est focalisé sur les technologies que nous utilisons sur le projet Menu Maker (React, JS, Firebase, etc.)

Une veille est également faite sur Twitter via les communautés, qui proposent des informations qui certes demandent une curation avant d'être exploitables, mais qui peuvent permettre d'avoir un autre angle d'approche sur les sujets suivis.

The screenshot displays the Twitter mobile application interface. On the left, a dark sidebar contains navigation icons for Home, Notifications, and Messages. The main screen is titled 'Communities' at the top, with a search icon and a user profile icon in the top right corner. Below the title, there are tabs for 'Home' (selected) and 'Explore'. The 'Home' tab displays a grid of community cards. The visible cards are 'Programming Language', 'Web Developers', 'JavaScript Developers', and 'OSINT'. Each card features a representative image and the community name.
